Project 3 Grading Rubric NEW

Criteria	Performance Quality		
	0 points	1 point	2 points
CSS	No external stylesheet is linked.	An external stylesheet is present to demonstrate use of a limited number of the requirements.	An exemplary stylesheet is linked properly. A number of CSS selectors and properties are demonstrated effectively. The stylesheet is well organized and CSS is cleanly written and formatted, including tabbing / indenting, declarations on separate lines, comments to organize sections, etc.
Layout	Page contains little or no layout styling. All or most required properties are missing.	Page contains layout styling adequate to demonstrate use of a limited number of the required properties.	Float are used with <div> elements to create a two or three column layout. Floats are properly cleared and parent of floated elements do not collapse.
Liquid Layout	Page contains little or no liquid layout styling. All or most required properties are missing.	Page contains liquid layout styling adequate to demonstrate use of a limited number of the required properties.	Layout is converted to liquid layout using % values. All font sizes are converted to Ems.
Background	Page contains little or no background styling. All or most required properties are missing.	Page contains background styling adequate to demonstrate use of a limited number of the required properties.	Repeating and non-repeating background images are implemented and positioned properly. Box model properties are adjusted so text doesn't cover non-preating background images where appropriate. CSS gradient is added.
Validation	Markup and/or stylesheet fails W3C validation, with many errors (more than 10).	Markup and/or stylesheet fails W3C validation, with a few errors (10 or less).	Markup and stylesheet passes W3C validation with no errors.

If any previous errors and / or ommissions are present they will also be deducted from your grade.
